18 December 1964

MEMORANDUM FOR: Special Assistant, Research and Reports  
FROM: Chief, Geographic Research Area  
SUBJECT: GRA Relations with Department of Commerce

1. The Cartography Division occasionally contacts the Bureau of the Census. Census has done odd jobs for us in preparing compilation data utilizing their area computer.

2. The Coast and Geodetic Survey is a member of the Inter-Agency Map Procurement Coordination Committee which is the group responsible for directing the activities of the Geographic Attache program. The Map Library also calls the Coast and Geodetic Survey for maps on a regular basis to satisfy CIA requirements. The Cartography Division has only occasional contacts with C & GS, mostly in the field of technical cartography and the development of new drafting and reproducing techniques and materials.
